First-year computer science student, future Web Developer, with 2 years of Web Development experience, and coding experience. Before entering school, I would find different ways to practice, learn, and implement code into projects. My passion for web development lead me to Eastern Florida where I am working on my Associates Degree, then into University of Central Florida to get my bachelor's degree in computer science.

Currently, I am taking a course on Zero To Mastery Academy called "Complete Web Developer in 2023: Zero to Mastery". In this course I have learned to strengthen my skills in HTML, CSS, Bootstrap, SCSS, DOM, JavaScript, React, Node, and many more languages/concepts.
